- NOTE:
- B4C Special Service Package is only available with Federal Emissions (FE9).
 - Coolant hoses are EPDM (Ethylene-Propylene-Diene) rubber; silicone hoses are not available.
 - Electronically controlled transmission provides protection against over-revving the engine in low range gear and a mechanical low gear blockout is not required. If a driver manually selects LOW range and fails to manually upshift to HIGH range, the Powertrain Control Module automatically protects the drivetrain.
